Investing involves risk, including potential loss of principal.

Morningstar rated the following Investor share class Funds for the period ending 03/31/2019: Defensive Market Strategies Fund: 4 and 5 stars among 690 and 601 Allocations—50% to 70% Equity for the 3- and 5-year periods. Global Bond Fund: 5, 4 and 5 stars among 257, 239 and 145 World Bond for the 3-, 5- and 10-year periods. International Equity Fund: 4, 4 and 3 stars among 644, 514 and 384 Foreign Large Blend for the 3-, 5- and 10-year periods. Global Real Estate Securities Fund: 3, 4 and 5 stars among 196, 152 and 111 Global Real Estate for the 3-, 5- and 10-year periods. Medium-Duration Bond Fund: 3, 3 and 4 stars among 901, 769 and 564 Intermediate-Term Bond for the 3-, 5- and 10-year periods. Equity Index Fund: 4, 4 and 4 stars among 1,218, 1,081 and 810 Large Blend for the 3-, 5- and 10-year periods; based on risk-adjusted returns. The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36–59 months of total returns, 60% 5-year rating/40% 3-year rating for 60–119 months of total returns and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. **Past performance is no guarantee of future results.**
