

FIRST QUARTER 2021

Fund Summary

The Global Real Estate Securities Fund seeks to provide long-term capital appreciation and current income. The Fund employs an actively managed, multi-manager approach that combines the benefits of bottom-up fundamental research and top-down macroeconomic analysis. It provides broad exposure to global real estate markets and is diversified across both property sectors and geographic regions.

SUB-ADVISER TARGET ALLOCATIONS^{1,2}

- Well-diversified core strategy
- Combines bottom-up research and top-down macroeconomic analysis
- Seeks to identify real estate securities that trade at a discount to intrinsic value but demonstrate strong potential for cash flow growth and sustained dividend increases

- Concentrated core strategy
- Combines bottom-up research and top-down macroeconomic analysis
- Seeks to identify real estate securities with attractive valuations and higher growth rates

USING THE GUIDESTONE GLOBAL REAL ESTATE SECURITIES FUND

With historically lower correlation to both equities and fixed income, adding real assets to an investment portfolio can offer meaningful diversification and help to reduce risk and increase return potential over a full market cycle.

Potential benefits of the Fund include:

- **Broad exposure to global real estate markets**
 - ❖ The Fund seeks to take advantage of different real estate cycles across the globe — providing the potential for increased returns while attempting to reduce risk compared to funds with a single-country focus.
- **Diversification across real estate sectors**
 - ❖ Unlike many real estate funds that have a dedicated sector mandate, the Fund provides broad exposure to various sectors, which can help offset declines and temper volatility.
- **Income potential**
 - ❖ Real estate can provide a steady stream of income while delivering relatively low correlation to both stocks and bonds — offering a potentially more consistent return stream for stability throughout the market cycle.
- **Inflation hedge**
 - ❖ Historically, both real estate values and rent prices have increased over time, which can lead to asset price appreciation that keeps up with and often exceeds the rate of inflation.

THE GUIDESTONE DIFFERENCE

Since 2001, GuideStone® has been a trusted investment manager for both institutional and individual investors. With \$16.7 billion in assets under management, GuideStone Funds® is the nation's largest faith-based mutual fund family.* We offer a wide array of equity, fixed income, real assets and alternative investment options to complement any portfolio.

INTENTIONAL RISK

Our goal is to understand the specific risks within a Fund. We make intentional risk-allocation decisions — emphasizing certain risks and de-emphasizing others — in an effort to generate excess returns.

RIGOROUS SUB-ADVISER RESEARCH

Experienced and diligent qualitative analysis, combined with robust quantitative analytics, allows us to evaluate, select and monitor sub-advisers — allocations to which are optimized at the Fund level.

FAITH-BASED SCREEN

We do not invest in any company that is publicly recognized, as determined by GuideStone Financial Resources®, as being in the alcohol, tobacco, gambling, pornography or abortion industries or any company whose products, services or activities are publicly recognized as being incompatible with the moral and ethical posture of GuideStone Financial Resources.

²GuideStone Capital Management, LLC, the adviser to the Fund, may invest directly in securities for risk management purposes only from time to time. These investments are used to assist in preserving the desired risk exposures for the Fund in furtherance of its investment objective. Direct investments that are short-term in nature are not included in the target allocations of the Fund to sub-advisers listed above.

Investment Considerations: This Fund invests substantial assets in REITs that involve equity market risks as well as risks linked directly to the real estate market. Risks include declines in the value of real estate, general and economic conditions, changes in the value of the underlying property and defaults by borrowers. The value of assets in the real estate industry may go through cycles of relative underperformance and outperformance in comparison to equity securities markets in general. Securities of foreign issuers may be negatively impacted by political events, economic conditions or inefficient, illiquid or unregulated markets in foreign countries, and they also may be subject to inadequate regulatory or accounting standards, which may increase investment risk. Investing in emerging markets may involve greater risks than investing in more developed foreign markets because, among other things, emerging markets often have more political and economic instability. This description of risks is provided as a summary of the principal investment risks associated with this mutual fund. Refer to the Fund's prospectus for more detailed risk information.
