

**Investment Objective:** The Fund seeks maximum total return consistent with preservation of capital.

**Investment Strategy:** The Fund is actively managed and invests in a diversified portfolio composed primarily of fixed income securities with an average dollar-weighted duration that normally will be greater than or equal to seven years.

**Investment Suitability:** This Fund may be suitable for investors who are seeking higher returns without investing in stocks, can accept short-term fluctuations in account value and want to diversify their portfolio with a fixed income investment option.

This Fund is subject to credit risk and interest rate risk. Interest rate risk means, when interest rates rise, the value of the existing bonds decrease and vice versa. Changes in interest rates have a bigger impact on long duration holdings than on short duration holdings. This description of risks is provided as a summary of the principal investment risks associated with this mutual fund. Refer to the Fund's prospectus for more detailed risk information.

**Benchmark<sup>A</sup>**

Bloomberg Barclays U.S. Aggregate Government & Credit – Long	50%
Bloomberg Barclays U.S. Intermediate Government/Credit	50%

**Annual Operating Expenses**

Gross Expense Ratio	Net Expense Ratio*
0.86%	0.86%

\* When the gross expense ratio and the net expense ratio are different, it reflects fee waivers and/or expense reimbursements for the Fund. Some expense limitation arrangements are voluntary and may end at any time. Others are contractual and – unless renewed – will end on a date specified in the agreement. Please refer to the prospectus for more information.

**PERFORMANCE<sup>1</sup>**

	Three Month	Year to Date	One Year	Three Year (Annualized)	Five Year (Annualized)	Ten Year (Annualized)	Since Inception (Annualized)
Fund	0.11%	-3.41%	-1.17%	4.11%	5.16%	8.53%	7.16%
Benchmark	-0.12%	-3.10%	-0.43%	3.86%	5.63%	7.29%	6.61%

**CALENDAR YEAR PERFORMANCE<sup>1</sup>**

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Performance data current to the most recent month-end and complete calendar year performance may be obtained at [GuideStoneFunds.com/funds](http://GuideStoneFunds.com/funds). The investment return of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance would have been lower without fee waivers and reimbursements to the Fund in effect. Year 2001 annual performance began 8/27/2001. Prior to 1/1/2018, the fund's benchmark was a composite of 50% Bloomberg Barclays U.S. Long-Term Government Index and 50% Bloomberg Barclays U.S. Long-Term Credit Index. Benchmark performance shown represents the fund's current benchmark linked with its previous benchmark.

## PORTFOLIO DETAILS<sup>3 4</sup>

### Asset Allocation

\* Cash is maintained by the fund for liquidity purposes and may be overlaid with equity and / or U.S. Treasury futures to provide capital market exposure.

### Fund Size (\$ in millions)

Total Fund Net Assets for All Share Classes	\$228
Number of Holdings*	226

\*Does not include currencies or forward currency contracts

### Portfolio Characteristics

Weighted Avg Maturity	13.82 years
Effective Duration	8.85 years
SEC 30-Day Yield	3.08%
SEC 30-Day Yield (Gross)†	3.07%

† Gross Yield reflects yield if fee waivers were not in effect.

### Risk/Return Characteristics\*\*

Standard Deviation	6.51%
R-Squared	90.02%
Beta vs. Benchmark	0.83
Beta vs. Bloomberg Barclays US Agg.	2.17
Sharpe Ratio	0.71
Information Ratio	-0.20

\*\* Calculated over previous 5 years

### Sub-Adviser Composite

Loomis, Sayles & Company	30%
Schroder Investment Management North America	70%

### Fixed Income Holdings\*\*\*

\*\*\* Duration Weighted

Duration — A measure of the sensitivity, or volatility, of fixed income investments to changes in interest rates.

Standard deviation—Depicts how widely returns varied over a certain period of time. A high standard deviation implies greater volatility and greater risk.

R-squared—Shows the percentage of a fund's performance that is explained by movements in the benchmark index. An R-squared of 100% indicates that all movements of a fund can be explained by movements in the benchmark.

Beta vs. Benchmark—Beta is a measure of a fund's sensitivity to market movements as defined by the fund's benchmark. A fund with a higher beta relative to the benchmark is more volatile than the benchmark.

Beta vs. Bloomberg Barclays U.S. Aggregate Bond Index—Beta is a measure of a fund's sensitivity to market movements as defined by the Bloomberg Barclays U.S. Aggregate Bond Index.

Sharpe Ratio—A risk-adjusted measure that measures reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance.

Information Ratio—Measures how much the fund outperformed the benchmark per unit of additional risk taken.

Weighted average maturity—The average amount of time remaining before the debt securities in a portfolio mature.

<sup>1</sup> The performance quoted reflects fee waivers in effect, and would have been lower in their absence. All figures shown represent total return, except for those identified as yield. Total return is based on net change in NAV with reinvestment of all distributions. Returns for periods less than one year are aggregate and for periods greater than one year are annualized. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees or other expenses.

<sup>2</sup> The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10%

receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating / 40% three-year rating for 60-119 months of total returns, and 50% 10-year rating / 30% five-year rating / 20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings are for the share class shown only; other classes may vary. **Past performance is no guarantee of future results.**

<sup>3</sup> Portfolio composition subject to change at any time.

<sup>4</sup> Due to rounding, portfolio holdings data may not sum to 100%.

<sup>^</sup> The Bloomberg Barclays U.S. Aggregate Government & Credit – Long Index is a long maturity constrained version of the Bloomberg Barclays U.S. Government/Credit Bond Index, which is a broad-based benchmark that measures the non-securitized component of the Bloomberg Barclays U.S. Aggregate Index. It includes investment grade, U.S. dollar-denominated, fixed-rate Treasuries, government-related and corporate securities. The Bloomberg Barclays U.S. Intermediate Government/Credit Index is an intermediate maturity constrained version of the Bloomberg Barclays U.S. Government/Credit Bond Index, which is a broad-based benchmark that measures the non-securitized component of the Bloomberg Barclays U.S. Aggregate Index. It includes investment grade, U.S. dollar-denominated, fixed-rate Treasuries, government-related and corporate securities. All indexes used with permission. It is not possible to invest directly in an index.
